EXPERIMENT

Title

MISSING ALPHABETS

Description

Pangram is a sentence containing every letter in the English alphabet. Given a string, find all characters that are missing from the string, i.e., the characters that can make the string a Pangram. We need to print output in alphabetic order.

For example,

Input: welcome to geeksforgeeks

Output: abdhijnpqvxyz

Source Code:

```
def missing_pangram_chars(s):
    alphabet = set('abcdefghijklmnopqrstuvwxyz')
    input_chars = set(s.lower())
    missing_chars = alphabet - input_chars
    return ''.join(sorted(missing_chars))

s = input().strip()
result = missing_pangram_chars(s)
print(result if result else "None")
```

RESULT

4 / 5 Test Cases Passed | 80 %
